Alta – The Choice of Progressive Dairies

Alta is the largest privately owned reproduction and genetic improvement company in the world. We strive to develop partnerships with progressive dairies located around the globe. Alta contributes to the profitability of our partners by offering consistent and rigorously tested products with genetic traits that effect profitability most under modern management systems. We add proven services in reproductive management and training designed to maximize the return on a dairy's investment in genetics.

Alta is a global company, with strong partnerships in over 80 different countries. The United States, The Netherlands, Canada, Poland, United Kingdom, Germany, and Brazil are homes to Alta's retail teams of expert sales and specialist staff. Alta is expanding its reach into over 75 other markets worldwide through strong local business partnerships with distributors and progressive dairies.

Alta brings a single mission to the many partners we work with worldwide - Create Value, Build Trust, Deliver Results.

Alta is based in Calgary, Alberta, Canada, with product development operations in Canada, United States, The Netherlands, and Brazil.
